

Dementia Awareness

Dementia is used to describe the symptoms that occur when the brain is affected by specific diseases and conditions. Dementia is a chronic progressive problem of cognition - which is failure of the brain's functions. IT affects people at different stages of life, it affects different parts of the brain and it affects it at different speeds.

This course is intended to give you an overview of the common types and symptoms of dementia as well as going into how it can affect the brain in different ways. It also covers strategies to use with clients with dementia and dealing with challenging behaviour. The course is intended for anyone who works with or around people that may be suffering with dementia.

Course	Module Number	Module Name	Pass % Required
Dementia Awareness	1	What Is Dementia?	70
